My 10 year old son is just finishing up ARTree's "Art Exploration" class and I can't tell you how much he is enjoying it! We love how the class is taught by various instructors who bring their passions and talents and share it with the students. As a parent I love how each class has purpose and instruction built into it, but of course my son just loves the experience of all the fun and creative projects he has been able to do. This class is a bit of a drive for us, but it has been worth it-- so much so that we are planning on taking another class next term. Thank you ARTree!!"

Seriously, Thank you to you and your wonderful staff! It's been such a pleasure.

Grace Chung, homeschool Mom
